

Town of Charlestown Water Main Flushing

Monday April 30, 2012 through Wednesday May 2, 2012

Twice a year the Town of Charlestown flushes the water mains at a high flow rate to remove any impurities that may build up in our system over time. This procedure may cause discoloration or riley water which will clear up fairly quickly, the water is safe to use and the system will be cleaner when we are complete.

Thank you,
Charlestown Water Department
